# JOURNAL OF MOLECULAR LIQUIDS

*Contents of Volume 37*

The statistical correlation between rotation and translation: implications for fine and hyperfine structure in quantum mechanics
M.W. Evans (Swansea, Gt. Britain) ..... 1
Irrotational and vortex fields in the theory of molecular dynamics
M.W.Evans (Swansea, Gt. Britain) ..... 21
Dielectric relaxation studies of some fluoro, chloro, bromo substituted anilines and their mixtures in benzene
A.D.Vyas and V.M. Vashisth (Ahmedabad, India) ..... 35
Molecular electronic states in liquid phase: configuration interaction states
L.M. Sesé (Madrid, Spain) ..... 45
Numerical test of the nonstationary character of the correlation functions for microcanonical ensembles at short times
M.W. Evans (Swansea, Gt. Britain) and C.A. Chatzidimitriou-Dreismann (Berlin, F.R.G.) ..... 59
Nonstationary character of cross-correlation functions in stationary nonequilibrium ensembles: a computer simulation study
M.W. Evans (Swansea, Gt. Britain) and C.A. Chatzidimitriou-Dreismann (Berlin, F.R.G.) ..... 77
Étude des propriétés diélectriques de microémulsions ioniques huile/eau et eau/huile au moyen de paramétres ioniques
J.M. Moreau and G. Delbos (Talence, France) ..... 87
The determination of stability of macrocyclic ether complexes by use of $^{13}C$ dipole—dipole relaxation time measurements. Part IV. Determination of free energy of complex formation of $Li^+$, $Ca^{2+}$ and $Mg^{2+}$ with 1, 4, 7, 10-tetraoxacyclododecane, (12.Crown.4) in methanol$_{-d}$ and DOH solutions
C. Erk (Diyarbakir, Turkey) ..... 107
$^{13}C$ relaxation of dichloromethane in solution
A.A. Rodriguez, A.F.T. Chen and M. Schwartz (Denton, TX, U.S.A.) ..... 117
Dielectric spectroscopy on aqueous solutions of some nitrogen-containing linear hydrocarbon polymers
U. Kaatze, O. Göttmann, R. Podbielski and R. Pottel (Göttingen, F.R.G.) ..... 127
FT-far infrared study of the $\nu_o$ vibration in hydrogen bonded complexes involving biological bases
J. de Taeye and Th. Zeegers-Huyskens (Heverlee, Belgium) ..... 143
Effect of boundary conditions in the Monte Carlo method on energy and structural characteristics of liquids. Calculation of water and the aqueous methane solution
I. Sheykhet and B. Simkin (Rostov-on-Don, U.S.S.R.) ..... 153
The micellization of n-octylammonium carboxylates in some aromatic solvents at different temperatures: nuclear magnetic resonance and dielectric evidence
M.A. Desando, C. Mallard and S. Walker (Thunder Bay, Ont., Canada) ..... 167
Comportement diélectrique dans le domaine des micro-ondes des polymères charges en fonction de la nature des inclusions
G. Vicq et A.-M. Bottreau (Talence, France) ..... 181
Density dependence of quadrupole induced spectra in simple fluids from molecular dynamics simulation
P. Maselli, D. Rocca (Rome, Italy) and U. Buontempo (L'Aquila, Italy) ..... 217
Symmetry properties of cross correlation functions in molecular liquids
M.W. Evans, C.G. Lie and E. Clementi (Kingston, NY, U.S.A.) ..... 231
Comment on "A new expression for the combinatorial entropy of mixing in liquid mixtures"
W.E. Acree, Jr. and J.W. McCargar (Kent, OH, U.S.A.) ..... 249

Thermochemical investigations of associated solutions. 7. Development of solubility expressions based on the Huyskens and Haulait—Pirson definition of solution ideality
W.E. Acree, Jr. and J.W. McCargar (Kent, OH, U.S.A.) ..... 251
Spin-lattice relaxation in hydroquinone/1,4-naphtaquinone—methanol solutions
F. Tabak and G. Bingöl (Ankara, Turkey) ..... 263
Inferring structural changes of hydroxylic solvents from NMR data
P. Mirti and V. Zelano (Turin, Italy) ..... 281
